

BIO REJUVEN

Face Cream

Bio-Stimulating
Smoothing

Segment

HOME SKIN CARE: Smoothing anti-wrinkle firming bio-stimulating cream.
Code D09, Vol. Small jar 50 ml.

Product structure

Soft cream, precious and pleasant structure with no parabens, allergens-free fragrance.

Product characteristics

BIO-REJUVEN: Bioceutic multiple action, its unique formulation incorporates the synergy of various active substances with strong bio-stimulating and invigorating properties and energizing the anabolic mechanisms responsible for the production of collagen, elastin and GAGs. Other substances present in the formulation ensure excellent protection against free radicals and stimulate regenerative processes.

Benefits

The skin is smoother, it improves brightness and hydration, it improves skin elasticity and skin tone, progressive reduction of fine lines and wrinkles, promotes revitalization of metabolic processes, antioxidant broad spectrum.

Active substances

AHAs (Glycolic Acid, Mandelic Acid): Reduces thickening of the stratum corneum by having an impact on the bonds between the corneocytes, increases the internal thickness of the epidermis, reactivates cellular metabolism, contributes to the renewal and restructuring of the dermis, facilitates the penetration of other active substances, has a direct and indirect positive effect on many biochemical processes of the skin, helps to maintain a more uniform skin color.

IDP- 5 (Oligopeptide-20 Nano-Encapsulated): Increase the thickness of the epidermis vital reduces and prevents the formation of fine lines and wrinkles, strengthens skin elasticity by inducing the synthesis of collagen and elastin, it contributes to the regeneration and reorganization of the constituents the MEC (Extra Cellular Matrix).

DIPEPTIDE- 4: Bio-protector broad range, protects the skin from oxidative stress, improves the natural defense mechanisms against oxidative stress (SOD and catalase), reduces carbonylation protein, improves the protection of the DNA, decreased lipid peroxidation, it protects against damage glycation.

SOLAR FILTERS: Medium protection against UVA-UVB.
