

HOMEO ROSE Skin Cream

Anti-Redness
Hyper-Sensitive
Couperose Skin

Segment

HOME SKIN CARE: Cream.
Code D25, Vol. Tube 15 ml.

Product structure

Quickly absorbed cream containing no parabens.
Allergen-free fragrance.

Product characteristics

HOMEO ROSE Cream: Product designated for skin with intensive inflammation, areas, and couperose. The cream formula was developed in such a way that all the ingredients by interacting with one-another, can influence different aspects of a problem and favour skin normalisation. Known to normalize inflammatory processes, it reduces the expansion of the blood vessels and microvascular permeability, helps to strengthen capillary walls, decreases skin sensitivity to temperature changes.

Benefits

- Effectively prevents the couperose problem.
- Normalizes extensive microcirculation extension.
- Thickens capillary walls.
- Clearly reduces redness, including chronic redness.
- Helps to prevent rosacea development.
- Reduces skin sensitivity to temperature changes.
- Strengthens the skin barrier.

Active substances

VPG-FACTOR S15 - exclusively Natinuel: Allows to retain the integrity of capillary vessels, nourishes and improves the metabolic exchange between skin cells, improves cellular oxidation, helps to remove negative body waste products and toxins, allows to retain the integrity of capillary vessels by increasing the tolerance threshold of sensitive skin, decreases the skin reactivity for various types of stimuli, decreases the reactivity of skin nerves, reduces the feeling of pain and discomfort.

VITAMIN PP: Has the ability to raise the properties of the skin's barrier by regulating sphingolipids production within the skin, specifically ceramides.

TRIPLEPTIDE-8: Reduces the activity of proinflammatory cytokines, decreases the tendency to dilated blood vessels, edema and erythema, allows to maintain the proper threshold of skin sensitivity.
