

HOMEO ROSE MASK

Anti-Couperose
Desensitizing
Normalizing

Segment

PROFESSIONAL SKIN CARE: Mask.
Code 23, Vol. Tube 150 ml.

Product structure

Cream-like consistency.
Allergen-free fragrance.

Product characteristics

HOMEO ROSE MASK: Cream-mask designated for treatment of inflammatory skin, and skin with couperose. Its formula has been developed to immediately stabilize the skin which is intensely flushed. Active substances contained in the cream-mask have the influence on various biochemical processes being the cause of discomfort, crucial either from aesthetic or functional point of view. The mask has a double effect: after applying it can be washed away or stay until it absorbs into the skin by massaging delicately, as the cream finishing the treatment.

Benefits

- Effectively prevents the couperose problem.
- Normalizes extensive microcirculation extension.
- Thickens capillary walls.
- Clearly reduces redness, including chronic redness.
- Helps to prevent acne development.
- Reduces skin sensitivity to temperature changes.
- Strengthens the skin barrier.

Active substances

CHRYS 2B (Biotechnological Derivative of Chrysanthellum): Has intensive anti-inflammatory properties based on the blocade of chemical mediators of inflammation.

VEDACALMINE: Anti-inflammatory and moisturizing properties, which help to restore the hydrolipidic film by creating the protective layer, which reduces TEWL. Main ingredient of the complex is BOSWELIC ACID.

KARITE' BUTTER: Contains very high fat content (from 12% up to 18%), necessary and basic for improving the skin elasticity, and in particular for retaining its standard flexibility.

CRYSTAL SKIN 1000: Biomimetic emulsion with the liquid crystal structure, dermocompatible with lipids from extracellular matrix, favours the integrity of the skin's barrier.
