

MILK MAKE UP

Normal and Delicate Skin
Face and Eyes
Removing Make Up

Segment

HOME SKIN CARE: Milk.
Code D01, Vol. Flacon 150 ml.

Product structure

Fluid milk with allergen-free fragrance.

Product characteristics

MILK MAKE UP: Is a fluid milk, based on dermo-compatible light oil-in-water emulsion, which creates a non-occlusive barrier on the whole skin in order to slow down the water loss by evaporation. The milk was also enriched with natural substances having soothing and decongestant properties. The product is indicated for an optimal make-up removal, even in the eye area. It is non-irritating and can also be used on delicate and sensitive skin.

Benefits

After rinsing the milk all the make-up particles will be eliminated and the skin will be made ready for cleansing.

Active substances

VITAMIN E: A fat-soluble molecule associated with biological membranes and lipoproteins, it protects polyunsaturated fats from peroxidation.

AVOCAD OIL: Thanks to very high content of unsaponifiables, avocado oil has unique eudermic and sebum-like properties and forms a protective film on the surface of the skin. It performs surface restoring action when applied to matt, dry and dehydrated skin.

CHAMOMILE EXTRACT: Emollient, protective, purifying action.

MARIS AQUA: Revitalizing, tonifying.

ALOE VERA: It is a great moisturizer for the skin, due to its content of polysaccharides it creates a barrier that prevents Transepidermal Water Loss.

AVENA SATIVA – OAT OIL: Emollient, soothing properties.
