

OXY 100 Face Cream

Oxygenating
Energizing
Restorative

Segment

HOME SKIN CARE: Oxygenating cream, sanitizer, regenerating cream.
Code D28, Vol. Airless 50ml.

Product structure

Thick and rich cream without parabens, allergen-free fragrance.

Product characteristics

OXY 100: Is an innovative cream based on ozonides integrated with a special peptide, this particular type of synergy makes the skin tissue more oxygenated and moisturized. Once applied to the skin OXY100 frees nascent oxygen which combines with hemoglobin to oxygenate the tissues. This particular speeds up the healing of skin lesions, improves wound healing and reactivates and reorganizes multiple metabolic mechanisms that are fundamental for a healthy and biologically younger skin.

Benefits

It increases tissue oxygenation, increases the ATP, improves the repair of wounds and skin lesions of various kinds, has sanitizing properties, improves healing, strengthens the skin's natural defenses, stimulates various metabolic processes, improves the vascularization of regenerated tissues.

Active substances

OZONIDES: The ozonides are a special mixture of oil and ozone which provides the skin with stable ozone enabling the skin to exploit fully its peculiar and multiple properties. It revitalizes cellular metabolism, improves microcirculation and oxygenation of tissues.

BIO-PEPTIDE: It improves the production of collagen, elastin, proteoglycans, glycosaminoglycans and other components of the skin matrix. It enhances various catabolic processes, restrains the process called glycation, regulates MMPs, enhances endogenous antioxidant system, improves the vascularization of the skin, counteracts the skin inflammation (through blockade of interleukin-1).
