

# POLI SOFT

Moisturizing  
Regenerating  
Antioxidant

## Segment

**PROFESSIONAL SKIN CARE:** Soft peeling.  
Code P06, Vol. Flacon 100 ml.

## Product structure

Viscosity gel spreads evenly and easily on problem areas.

## Product characteristics

**POLI SOFT:** Is a new soft (facial) scrub ideal for revitalizing the skin in all its structural and functional integrity. It is a product suitable for different skin types, even the most sensitive and delicate skin. It contains a high concentration of two polyhydroxy acids perfectly balanced against each other in order to be able to take full advantage of their multiple properties.

## Benefits

- Skin becomes soft, firm, smooth, radiant, moisturized.

Strengthens skin against external aggressions, revitalizes the epidermis.

## Active substances

**GLUCONOLACTONE:** It is found naturally in the skin as an important active substance speeding up the cell renewal processes. In fact, the keratinocytes synthesize and naturally convert the gluconic acid and gluconolactone into Ribose and Deoxyribose which are respectively the main components of RNA and DNA. It has strong moisturizing, properties modulates the process of keratinization, revitalizes cell turnover. It's a natural antioxidant against RL, improves the skin barrier function, especially in sensitive skin, improves skin texture and protects it from photoaging.

**LACTOBIONIC ACID:** It is an iron-chelating agent which has very strong antioxidant properties, strong hygroscopic properties (the ability of a substance to attract and hold water molecules from the surrounding environment (liquid and gas)). It's hyper-moisturizing, it has a remarkable restorative properties promoting cellular renewal, it modulates the process of keratinization and increases firmness of epidermis, it prevents and reduces the signs of skin aging.
