

REDOXYL

Antioxidant Complex
Regenerator
Face Neck Decollete`

Segment

PROFESSIONAL SKIN CARE: Antioxidant, Regenerating Serum.
Code PD03 / 1 – Vol. Flacon 30 ml.

Product structure

This serum is quickly absorbed. It contains no parabens or fragrances.

Product characteristics

REDOXYL: Free radicals affect mainly three components of the cell: lipids, proteins and nucleic acids (DNA and RNA). REDOXIL is a professional serum containing high concentration of 3 substances which are synergistic with one another and thus guarantee a strong and comprehensive anti-oxidant effect, protect cell membranes, improve skin microcirculation and promote optimal neocollagenogenesis.

Benefits

- Full-spectrum antioxidant.
- Increased bio-protection of cell membranes.
- Bio-protection and improvement of microcirculation.
- Improved neocollagenogenesis.

Active substances

RESVERATROL: Is a natural stilbene capable of interacting with biological structures, triggering a series of processes of protective and defensive mechanisms. Resveratrol and 'an effective antioxidant with dual mechanism of action, ' because it acts both as a chelating agent and as a free radical scavenger. It has anti-inflammatory and vasorelaxing effect, has the ability to stimulate cell proliferation and collagen synthesis to inhibit proteases and efficiently and selectively block the UV-B radiation.

LIPOCROMAN-6: Increases cell viability against oxidative stress by blocking both ROS and RNS, increases photoprotective mechanisms of cells, prevents photoaging of the skin, protects the cellular DNA.

ASCORBOSILANE (Ascorbic Acid, associated with Silicon): Strengthens the immune system and supports the body's defense mechanisms, an important cofactor in collagen production, prevents the formation of free radicals, strengthens cell membranes and protects against oxidative damage.
