

THE LOOK

Face Cream

Decontracting
Anti-Puffiness
Anti- Dark Circles

Segment

HOME SKIN CARE: Decontracting anti eye bag anti-dark circles firming eyes cream.
Code D14, Vol. Airless 15 ml.

Product structure

Lightweight cream having emolient properties, spreads easily on the skin, leaving a pleasant sensation of softness, parabens-free, allergen-free fragrance.

Product characteristics

THE LOOK: Is a new generation bioceutical preparation showing strong activity. THE LOOK impacts various imperfections of the eye area such as: skin tone, facial wrinkles, dark circles under the eyes, eye bags and hydration. This product ideal for a complete renovation and rejuvenation of the whole area around the eyes. Significant reduction in the frequency of muscle contractions, decreased expression wrinkles, elimination of fine lines, reduction of eye bags and dark circles, skin becomes firmer, more compact and better moisturized.

Benefits

Significant reduction in the frequency of muscle contractions, decreased expression wrinkles, elimination of fine lines, reduction of eye bags and dark circles, skin becomes firmer, more compact and better moisturized.

Active substances

VIALOX (Pentapeptide -3) + ARGIRELINE (Hexapeptide -8): They interact synergistically on the biochemical mechanisms of muscle contraction significantly reducing mimic wrinkles.

INYLIN (Pentapeptide -3): It acts on the postsynaptic membrane by inhibiting the complex Agrin / MASC Thus preventing the clustering of receptors AChRs. None of this can trigger the biochemical phase post-synaptic and you get a result in a net reduction of mimic wrinkles.

SYN-COLL (Palmitoyl Tripeptide -3): This peptide strongly stimulates the neoproduction collagen and elastin. It also protects collagen by inhibiting the enzymatic degradation (MMPs 1 and MMPs 3), and block proinflammatory cytokines.

EYELISS (Hesperidin Methyl Chalcone, Dipeptide -2, Tetrapeptide- 7): It improves capillary fragility and regulates their permeability. Eliminates material build-up of metabolic waste and liquid, and that 'the main cause of bags under the eyes, improves lymphatic drainage, the exchange and the movement of extra-cellular fluids. It acts on the inflammatory component and sagging skin, improving firmness elasticity tone to the skin.

HALOXYL (Oligopeptide, Tripeptide -3, Crisina Complex): Complex specifically to eliminate the accumulation of by-products of oxidized hemoglobin, with a clear and steady reduction of dark circles under the eyes. It also strengthens the capillaries, preventing leakage and accumulation of hemoglobin. It has a strong anti-inflammatory action by inhibiting prostaglandin PGE2 improves the tone and firmness of the skin that helps to even out the color under the eyes.

QUINTESCINE (Dipeptide - 4): Bio-protector broad range, protects the skin from oxidative stress, improves the natural defense mechanisms against oxidative stress (SOD and catalase), reduces carbonylation protein, improves the protection of DNA, decreases peroxidation of lipids, protects against damage glycation.
