

ULTRATON

Face Neck Décolleté Cream

Tonifying
Remodelling
Regenerating

Segment

HOME SKIN CARE: Firming toning fluid cream for face neck décolleté.
Code D22, Vol. Airless 50ml.

Product structure

Fluid cream of complex structure, it is quickly absorbed leaving your skin velvety soft and smooth. It contains fragrance without allergens.

Product characteristics

ULTRATON: Is a specific bioceutic cream shown to improve the tone, firmness and elasticity of the skin of your face, neck and décolleté. It contains a number of new peptides and bioactive substances able to interact synergistically and sectorally with the substances constituting the dermo-epidermal junction (DEJ). Their effective stimulation will help restore structural integrity, the molecular communication between the epidermis and dermis and will help the regeneration of the constituents of ECM (Extra Cellular Matrix).

Benefits

It increases cellular cohesion, skin tone and elasticity, it also increases the thickness of the dermis and deep layers of the epidermis it restructures the GDEJ, improves the firmness and compactness of the skin. It also helps to relieve facial wrinkles.

Active substances

TRIPEPTIDE 1 + PROTEIN COMPLEX: Blocks Radical Carbonyl Species (RCS) protects DNA from damage induced by UVA, detoxifies skin cells, prevents glycation of collagen, stimulates the synthesis of collagen III.

DIPEPTIDE 5+6: Interacts with many structural proteins of the DEJ such as: LAMININ 5, COLLAGEN type IV-VII-XVII, INTEGRIN stimulating their regeneration. It improves skin firmness and compactness as well as cell communication.

DMAE: Improves skin firmness and muscle tone, improves the synthesis of collagen and elastin. It has antioxidant properties.

RENOVAGE: Extends normal cell lifespan, improves cellular metabolism, increases bio-protection of chromosome telomeres.

HEXAPEPTIDE-10: Promotes the restructuring of DEJ, increases the number of hemidesmosomes, stimulates the production of laminin -5.

ASCORBYL PALMITATE: Strengthens the immune system and supports the body's defense mechanisms, promotes cell renewal processes, important cofactor in the collagen production, it is an important antioxidant (ROS).
